Re: Design Revision No. 1  
Sunbury Ash Basin No. 1 Dam  
Monroe Township, Snyder County  
Application No. D55-052

Dear Mr. Griegel:

Reference is made to the information submitted by L.R. Kimball with correspondence dated May 19, 2016 regarding the proposed revision at Sunbury Ash Basin No. 1 Dam. The proposed revision includes reducing the footprint of the stormwater area by placing approximately 60,000 cubic yards of additional fill. This dam is located within the watershed of the Susquehanna River in Monroe Township, Snyder County.

We have reviewed and approved this proposed design revision. The approved revision and any additional minor revisions made to the design during construction should be indicated in as-built drawings to be submitted to this office upon completion of construction

If you have any questions concerning this matter, please contact Heath Maines of our staff by e-mail at [hmaines@pa.gov](mailto:hmaines@pa.gov) or at 717.772.5960.

Sincerely,

Kirk A. Kreider, P.E.  
Chief  
Construction, Inspection and Monitoring Section  
Division of Dam Safety
